Our Journey

Made in India Vision

At Laxree Roofing Solutions, our journey begins with a proud commitment to the Made in India vision. We founded this company with the purpose of contributing to India's growth and development by providing innovative, reliable, and durable roofing solutions tailored specifically to Indian standards, climate and environmental conditions.

Why We Started

India's diverse climate, ranging from scorching heat to heavy monsoons, demands specialized roofing systems that can withstand these extreme conditions. Recognizing this need, we embarked on a mission to develop roofing solutions that are not only resilient but also environmentally sustainable and cost-effective. Our goal is to empower local communities, create job opportunities, and foster economic growth by building a manufacturing and innovation hub right here in India.

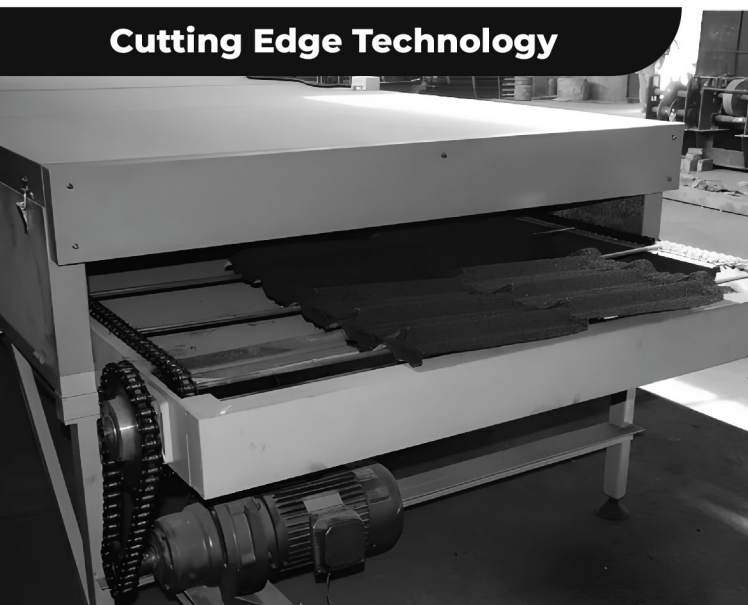

Our Unique Commitment

Laxree Roofing Solutions is India's first company focused on creating jobs through innovative, patented roofing technologies tailored for Indian conditions. Committed to quality and durability, we aim to shape the future of roofing in India by integrating advanced technology, sustainability, and local expertise.

Asphalt Shingle Tile

22

A close-up photograph of a single stone-coated roof tile. The tile has a dark brown, granular texture with many small, light-colored specks. It is part of a larger roof structure, with other tiles visible in the background. The lighting is bright, creating a slight shadow on the right side of the tile.
